

Recombinant Staphylococcus Aureus ISDB Protein (41-269 aa), His-SUMO-tagged

SPECIFICATION

Cat.No.	ISDB-2081S
Species	Staphylococcus aureus
Product Name	Recombinant Staphylococcus Aureus ISDB Protein (41-269 aa), His-SUMO-tagged
Product Overview	Recombinant Staphylococcus Aureus (strain USA300/TCH1516) ISDB Protein (41-269 aa) is produced by E. coli expression system. This protein is fused with a 6xHis-SUMO tag at the N-terminal. Research Area: Microbiology. Protein Description: Partial.
Description	Seems to function as the primary receptor for hemoglobin since its inactivation inhibits the ability of S.aureus to bind hemoglobin. Binds hemoglobin in a dose-dependent way. Required for S.aureus growth using hemoglobin as the sole iron source. Also required for virulence. IsdA and/or IsdB promote resistance to hydrogen peroxide and killing by neutrophils (By similarity).
Source	E. coli
Tag	His/SUMO
Form	Tris-based buffer, 50% glycerol
Molecular Mass	41.6 kDa
Protein length	41-269 aa

Purity	> 90% as determined by SDS-PAGE.
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4 centigrade for up to one week.
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form

Recombinant Staphylococcus Aureus ISDB Protein (41-269 aa), His-SUMO-tagged

is 6 months at -20 centigrade/-80 centigrade. The shelf life of lyophilized form is 12 months at -20 centigrade/-80 centigrade.

Concentration	A hardcopy of COA with reconstitution instruction is sent along with the products.
