CREATIVE BIOMART® Microbe

Biological Deodorant

SPECIFICATION

Cat.No.	EPB-004
Product Name	Biological Deodorant
Product Ingredients	Photosynthetic bacteria, *Lactobacillus plantarum*, *Acidophilus lactobacillus*, deodorant factor, biological active agent, etc.
Product Format	Brown Liquid
Shelf Life	18 Months
Bacterial Content	10×10^9 CFU/mL
Application	It is suitable for municipal waste transfer station, landfill, livestock farm, chemical waste gas plant, hotel indoor environment purification and other odor environment.
Product Details	After a long period of trial and matching, the product has been researched to find the best ratio. Through domestication, rejuvenation culture, and fine fermentation, a complex microbial flora that can adapt to different odorous environments has been cultivated, which can quickly adapt to various environments, reproduce rapidly, and quickly improve the air environment.
Efficacy and Effect	1. The main function is to use the metabolic activities of microorganisms to degrade the malodorous substances, and to oxidize the malodorous substances into the final products. The sulfur-containing malodorous substances are decomposed into S, SO32- and SO42-; And N2-; malodorous substances without sulfur or nitrogen are decomposed into carbon dioxide and water, so as to achieve the purpose of odor purification. High treatment efficiency, can quickly remove odor, purify water quality, reduce COD, BOD5, ammonia nitrogen and other indicators, the degradation rate of organic matter is dozens of times faster than traditional methods, easy to use, high bacteria content. 2. Different odor conditions can be adjusted through technical means, and the environment adaptability is strong. 3. The finished product is rich in various trace elements to promote the growth of local native microorganisms.

Biological Deodorant

Usage Method	1. The dilution ratio of malodorous environment is routinely sprayed evenly according to the ratio of 1:50. 2. In special or emergency situations, the ratio of 1:10-1:300 can be sprayed according to the actual situation.
