

Phage display cyclic heptapeptide library screening kit

SPECIFICATION

Cat.No.	PHA-0001K
Product Name	Phage display cyclic heptapeptide library screening kit
Description	The Phage Display C7C Peptide Library is based on a combinatorial library of random disulfide looped peptides fused to the N-terminus of a minor coat protein (pIII) of M13 phage. The ready to use complex phage library can be used to discover peptide binders in less than one week with straight-forward molecular biology and sterile culture techniques.
Packaging	Kit set
Concentration	10 ¹³ PFU/mL
