

## Recombinant E. coli Holliday Junction DNA Helicase RuvC

| SPECIFICATION    |  |
|------------------|--|
| Cat.No.          | RuvC-2666E   |
| Species          | E. coli  |
| Product Name     | Recombinant E. coli Holliday Junction DNA Helicase RuvC  |
| Product Overview | Recombinant <i>E. coli</i> Holliday Junction DNA Helicase RuvC is expressed in E. coli<br>MW=19KDa.  |
| Description      | E. coli RuvC protein is a structurally specific endonuclease which binds specifically to<br>the Holliday structure, an intermediate of recombination, at the late stage of<br>homologous recombination and recombination repair and introduces a nick in the<br>symmetrical point of the Holliday junction cleaving and resolving the recombinant. |
| Source           | E. coli  |
| Form             | 50% glycerol, 10 mM Tris-HCl (pH7.5), 2 mM EDTA, 100 mM NaCl, 5 mM mercaptoethanol.  |
| Purity           | RuvC protein over 90% by SDS-PAGE (CBB staining).  |
| Usage            | 1) Studies on homologous recombination mechanism. 2) To use as endonuclease which functions specifically to the Holliday structure.  |
| Storage          | -20 <sup>0</sup> C.  |
| Concentration    | 1.0 mg/ml (determined by BCA method).  |
| Gene Name        | ruvC Crossover junction endodeoxyribonuclease ruvC [Escherichia coli O55:H7 str. CB9615]   |
| Synonyms         | ruvC; Crossover junction endodeoxyribonuclease ruvC  |
| Gene ID          | 8871275  |
| Protein Refseq   | YP_003499863   |
